

## ErgoWood™ with SafeTread™ Technology

>25%

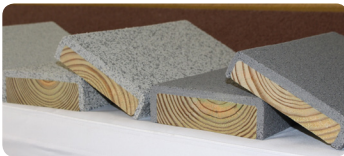

stronger than standard  
treated wood decking

>2x

the breaking strength of  
composite decking

Up to 30%

cooler in direct sunlight  
than other decking

Seals, protects, preserves from UV and water degradation

Dramatically increases slip resistance and impact absorption

'Pre-dried' – unparalleled dimensional stability

Measure, cut, nail, & screw just like wood

No special saw blades or tools required

No exposed fasteners

No pre-drilling required

Effectively will NOT:

shrink, crack, check, warp or cup

color fade or wear

scratch or chip

Never paint, stain or replace deck boards again

Self-draining

Impervious to mold, fungi and decay

Available in 8 ft., 12 ft. and 16 ft. lengths

Available in nearly infinite colors and combinations

Lengths can be custom cut to order, reducing waste

More coverage per board foot purchased

Less overall cost than wood and composite decking
